Norway

Dear Mr. Rado:

This is to confirm that the RUNAR pavement friction measuring device, operating in fixed-slip mode, is approved for use at U.S.A. airports.

The RUNAR will be listed in the next change to Federal Aviation Administration (FAA) Advisory Circular (AC) 150/5320-12B, Measurement, Construction, and Maintenance of Skid Resistant Airport Pavement Surfaces. Until this change is published, you may rely on this letter as confirmation of FAA approval.

Sincerely,

Rick Marinelli
Civil Engineer
