Dear Mr Rado,

This is in response to your facsimile, dated 17 January 2000, to the ICAO Public Information Officer regarding the inclusion of the RUNAR equipment in Annex 14, Volume I and the Airport Services Manual (Doc 9137) Part 2, Pavement Surface Conditions.

In my facsimile to Simon Kolin, dated 18 October 1996, I mentioned that I had received approval to include the name of the RUNAR equipment in Doc 9137, Part 2, as appropriate. That approval is limited to the publication of the name and any specifications which are deemed appropriate when compared to the information published for other such equipment in the manual. *Approval to publish this information does not in any way mean approval or endorsement of the equipment by ICAO.* Furthermore the appearance of information on this equipment in an ICAO publication should not be represented as an ICAO approval or endorsement. The information is published solely to facilitate comparison of the various types of equipment currently available. Doc 9137, Part 2 was reprinted due to reduced quantities only. It is currently undergoing revision and information on the RUNAR equipment will be included with this revision.

We will add the RUNAR and its relevant data to Attachment A, Table A-1 when we next amend Annex 14, Volume I.

Thank you for your continued interest in ICAO's work.

Regards

A.K.R. Rao
Chief,

Acrodromes, Air Routes & Ground Aids Section

Subject: Inclusion of RUNAR equipment in ICAO publications

Dear Mr. Rado,

Your facsimile, dated 19 September 2000, concerning the listing of RUNAR equipment in ICAO publications has been forwarded to me for response.

I am pleased to tell you that the next amendment to The Airport Services Manual (Doc 9137), Part 2, Pavement Surface Conditions, is in preparation and the RUNAR device for which you sent pictures and a technical description, has been included.

We do not yet have a publication date for the amendment.

Regards.

A. K. R. Rao
